

TITAN2

Robust design for the African market

A Smart Safe Note Management Solution that will not only save you time and money, but will also improve customer satisfaction and efficiency.

Key features

TITAN2

Enhancing customer service with high-speed, user-friendly, service automation in banking halls

★ The device comes with 2 manual locks and an electronic lock for dual access control

★ This cost-effective and efficient solution provides a range of optional and customisable features designed to improve the return on investment for your bank branch

★ The on-device application does more than just control the device to accept notes, it also allows the user to view certain reports of the transaction details, set up shifts and also create and manage users

★ The solutions also comes with an impressive back end application, that can be used to view various reports, set up third party account payment details and also clear certain errors remotely

★ Using bidirectional communicates, there is no more the need for a technician to visit sites to updated software, this can be done remotely

Shorter queues
Shorter waiting times
Higher productivity
