

DORS 115-125-135

Series of ultraviolet counterfeit detectors

DORS 135

Function

Professional visual authenticity control of banknotes, passports, credit cards, securities, duty stamps, traveler's cheques and other security printing documents.

Features

- Powerful source of UV light (2x6W)
- Special slot in a rear panel for placement of large documents up to A4 format.
- Wide viewing area with measuring scale (160x70 mm) – except DORS 115.
- Dark colour of the inner part of a detector guarantees absence of light flares even in bright room.
- New fail-safe circuit solution of the electronic board.
